***50+ countries** - millions of satisfied customers*

Thousands of professionals use our products worldwide on a daily basis. All of our implants are made of a biocompatible material - medical grade titanium alloy 5 with an extraordinary surface. **Our products meet the strictest international quality standards** - proven by CE certificate and approval of FDA.

IMPLANT CARE INSTRUCTIONS

- Successful oral surgery depends on keeping the oral cavity as clean as possible.
- You can start cleaning your teeth as normal starting from the evening of the day of surgery.
- Avoid brushing the surgical area for a few days, but once the tenderness permits, you can carefully begin to clean this area with a toothbrush as well.
- Try to keep food away from the surgical area for as long as possible. Rinse frequently after eating to keep the area clean.
- You are advised not to smoke until the wound has been healed, as smoking severely limits healing in the mouth.

”

*My biggest regret is that
I should have come 10 years ago!*

*

*Delighted with my **SGS Dental implants**, I feel and
look better than before. Treatment and after care
helped me a lot.*

Excellent!

*

*Very happy with my **SGS Dental implants and crowns!**
I would reccomend it to anyone who is considering
having them done.*

*

*I'm very pleased with the result! The whole
process was painless which I wasn't expecting.*

I can't stop smiling!
